IF YOU OR SOMEONE YOU KNOW ARE EXPERIENCING THESE SYMPTOMS...

- Sadness or “empty mood”
- Irritation or pessimism
- Decreased energy or fatigue
- Loss of interest in previously enjoyable activities
- Difficulty concentrating or remembering

SEEK HELP
Talk to a healthcare professional about the start date, frequency and severity of your symptoms. If you think someone has depression, encourage him or her to seek the right help.

MAINTAIN TREATMENT
If feeling better, do not stop treatment. Doctors will help you slowly and safely decrease medication or therapy. Expect your mood to improve gradually, not immediately.

FOCUS ON A HEALTHY LIFESTYLE

1. Be active and exercise.
2. Spend time with friends and relatives.
3. Postpone important decisions until you feel better.
