Virtual Care Has Increased 1.6x Since Summer of 2019

More than half of that growth has come since the onset of the COVID-19 pandemic.

Why It Matters

Behavioral health conditions have been on the rise in recent years and it’s important to keep an eye on the effect COVID-19 can have on mental health as well as physical health.

Data shows that certain negative behaviors have risen since the outbreak began. And these behaviors can lead to anxiety and major depression, as well as tobacco, substance, and alcohol use disorders.

Virtual care has increased telemedicine usage among age groups.
